

TO: Kennett Township Board of Supervisors
FROM: Roger Lysle, Public Works Director
SUBJECT: November 12, 2021 – December 10, 2021 Department Head Report

1. Crews have finished servicing all equipment for the winter.
2. Our crews worked to close roads for the Mushroom Cap Race held November 13, 2021.
3. Painting of the stop bars, crosswalks, and parking dividers was completed in Bayard Estate and Penn's Manor.
4. Crews have been cleaning up leaves in the Township in areas that require it, including inlets and shoulder areas where drainage is an issue.
5. There was a pump station issue this month at two plants. A blower motor had to be replaced and a pump around at that station due to power interruptions causing low voltage.
6. Several trees were down by high winds. While there were no power outages, tree cleanup was required.
7. Our yard waste pile is being ground for the second time this year. It should take about one week to grind into a pile then they will haul it out over the next two weeks. We can keep the yard waste lot open this time during grinding by changing our grinding location.
8. Shoulder repair was done on several roads where washout have occurred.
9. The temporary test road channeling on Chandler Mill Road was removed for the winter.
10. Tree trimming is underway for the winter months. We are working on all Township roads so please work with our crew on lane restrictions.
